INTRODUCTION

Watch Showroom

This project has been made for purchasing of stocked watches to customers for which customers have to make their Login Username and Password. It records customer's Name, Username, Gender, Mobile number. It contains Adding, Updating, Deleting and Details of members –viz (Customers). Also displays details of stock items. Customers can add their items to their cart, from there they can proceed to a new form “Cart” where they can see their cart items, can calculate total price to be paid and then place their order.

AIM

The main aim is to make purchases for entered products, quantities, and their payment methods in a modern cart type system in which customer can see their items can also see the total cost besides the item name in the table, or can calculate it by pressing calculate button and Buy it.

SQL (Backend)

Tables:-

```
mysql> show tables;
+-----+
| Tables_in_project1 |
+-----+
| items               |
| memberdetails       |
| members             |
| purchase            |
+-----+
4 rows in set (0.23 sec)
```

Table Structure:-

1. Member table

```
mysql> desc members;
+-----+-----+-----+-----+-----+-----+
| Field | Type          | Null | Key | Default | Extra |
+-----+-----+-----+-----+-----+-----+
| Name  | varchar(40)   | YES  |     | NULL    |       |
| UserID| varchar(40)   | YES  |     | NULL    |       |
| Gender| varchar(6)    | YES  |     | NULL    |       |
| PhoneNo| varchar(15)  | YES  |     | NULL    |       |
+-----+-----+-----+-----+-----+-----+
4 rows in set (0.06 sec)
```

2. Memberdetails table

```
mysql> desc memberdetails;
+-----+-----+-----+-----+-----+-----+
| Field      | Type          | Null | Key | Default | Extra |
+-----+-----+-----+-----+-----+-----+
| Name       | varchar(30)   | YES  |     | NULL    |       |
| UserID     | varchar(40)   | YES  |     | NULL    |       |
| Password   | varchar(25)   | YES  |     | NULL    |       |
| Gender     | varchar(6)    | YES  |     | NULL    |       |
| PhoneNumber| varchar(15)   | YES  |     | NULL    |       |
+-----+-----+-----+-----+-----+-----+
5 rows in set (0.27 sec)
```

3. Items table

```
mysql> desc items;
+-----+-----+-----+-----+-----+-----+
| Field | Type | Null | Key | Default | Extra |
+-----+-----+-----+-----+-----+-----+
| ICode | int(4) | YES | | NULL | |
| IName | varchar(30) | YES | | NULL | |
| Category | varchar(25) | YES | | NULL | |
| Price | int(11) | YES | | NULL | |
+-----+-----+-----+-----+-----+-----+
4 rows in set (0.01 sec)
```

4. Purchase table

```
mysql> desc purchase;
+-----+-----+-----+-----+-----+-----+
| Field | Type | Null | Key | Default | Extra |
+-----+-----+-----+-----+-----+-----+
| WatchName | varchar(40) | YES | | NULL | |
| Quantity | int(5) | YES | | NULL | |
| Payment | varchar(25) | YES | | NULL | |
| Price | int(11) | YES | | NULL | |
+-----+-----+-----+-----+-----+-----+
4 rows in set (0.04 sec)
```

Proceed

Do not have an account ? Create one today, [click here](#)

```
private void jButton1ActionPerformed(java.awt.event.ActionEvent evt) {  
    // TODO add your handling code here:  
    String ID=tfLogin.getText();  
    String Pass=txt_password.getText();  
    try  
    {
```

```
Class.forName("java.sql.DriverManager");
```

```
Connection
```

```
con=(Connection)DriverManager.getConnection("jdbc:mysql://localhost:3306/project1","root","tiger");
```

```
Statement stmt=(Statement)con.createStatement();
```

```
String query="SELECT * from MemberDetails where UserID='"+ID+"' and Password='"+Pass+"'";
```

```
ResultSet rs=stmt.executeQuery(query);
```

```
If(rs.next())
```

```
{
```

```
    JOptionPane.showMessageDialog(this,"Username and Password are correct");
```

```
    main_menu_2 ff = new main_menu_2();
```

```
    ff.setVisible(true);
```

```
    this.setVisible(false);
```

```
}
```

```
else
```

```
    JOptionPane.showMessageDialog(this,"Username and Password are incorrect");
```

```
    tfLogin.setText("");
```

```
    txt_password.setText("");
```

```
}
```

```
catch(Exception e)
```

```
{
```

```
    JOptionPane.showMessageDialog(this,e.getMessage());
```

```
}
```

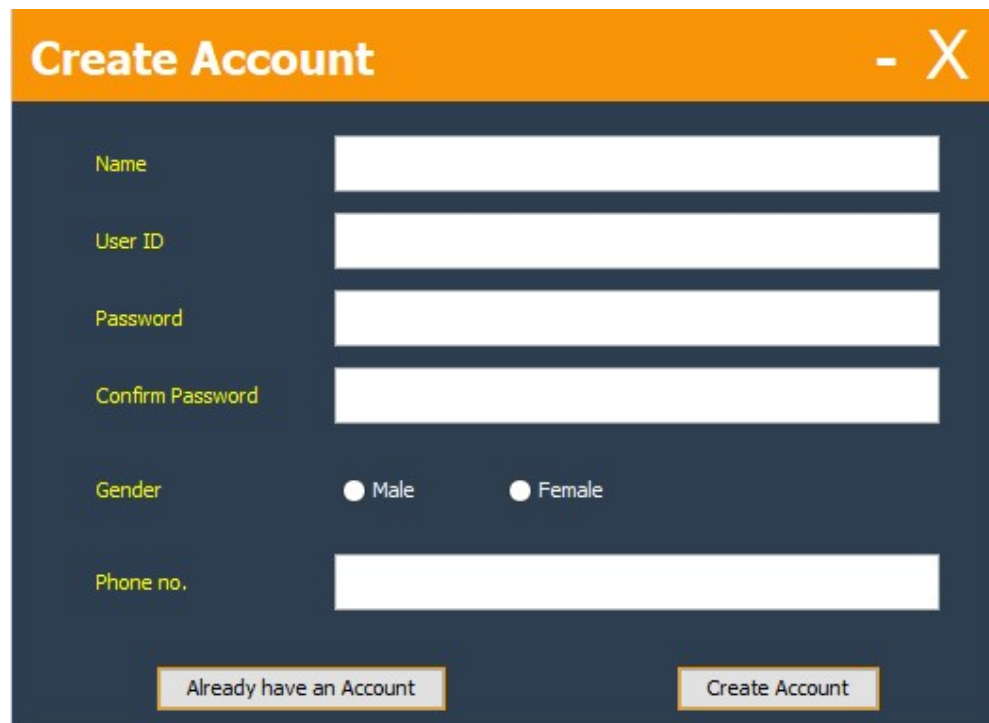

```
}
```

Coding for JLabel “click here” to go to JFrame “create_ac_1a” :-

```
private void jLabel5MouseClicked(java.awt.event.MouseEvent evt) {  
    create_ac_1a ff = new create_ac_1a();  
    ff.setVisible(true);  
    ff.pack();  
    ff.setLocationRelativeTo(null);  
    ff.setDefaultCloseOperation(proceed_1.EXIT_ON_CLOSE);  
    this.dispose();  
}
```

Create Account

JFrame: “create_ac_1a”

The screenshot shows a Java Swing window titled "Create Account". The window has a dark blue body and an orange title bar. Inside, there are labels and text fields for "Name", "User ID", "Password", and "Confirm Password". Below these is a "Gender" section with "Male" and "Female" radio buttons. At the bottom is a "Phone no." field. Two buttons, "Already have an Account" and "Create Account", are at the bottom right.

```
private void jButton2ActionPerformed(java.awt.event.ActionEvent evt) {  
    String Name=tfN.getText();  
    String UID=tfUI.getText();
```

```

String Pass=pf1.getText();

String Gender="";

if(rbMale.isSelected())

    Gender="Male";

else if(rbFemale.isSelected())

    Gender="Female";

String PhoneNum=tfPhone.getText();

try

{

    Class.forName("java.sql.DriverManager");

    Connection
con=(Connection)DriverManager.getConnection("jdbc:mysql://localhost:3306/project1","root","tiger");

    Statement stmt=(Statement)con.createStatement();

    String query1="SELECT * FROM MemberDetails where UserID='"+UID+"'";

    String query2="INSERT INTO MemberDetails
VALUES('"+Name+"','"+UID+"','"+Pass+"','"+Gender+"','"+PhoneNum+"')";

    ResultSet rs=stmt.executeQuery(query1);

    int found=0;

    while(rs.next())

    {

        JOptionPane.showMessageDialog(this,"Email already exist \n"+"please try a new email");

        found++;

        tfUI.setText("");

    }

    if(found==0)

    {

        stmt.executeUpdate(query2);

        JOptionPane.showMessageDialog(this,"Account created successfully !");

    }

}

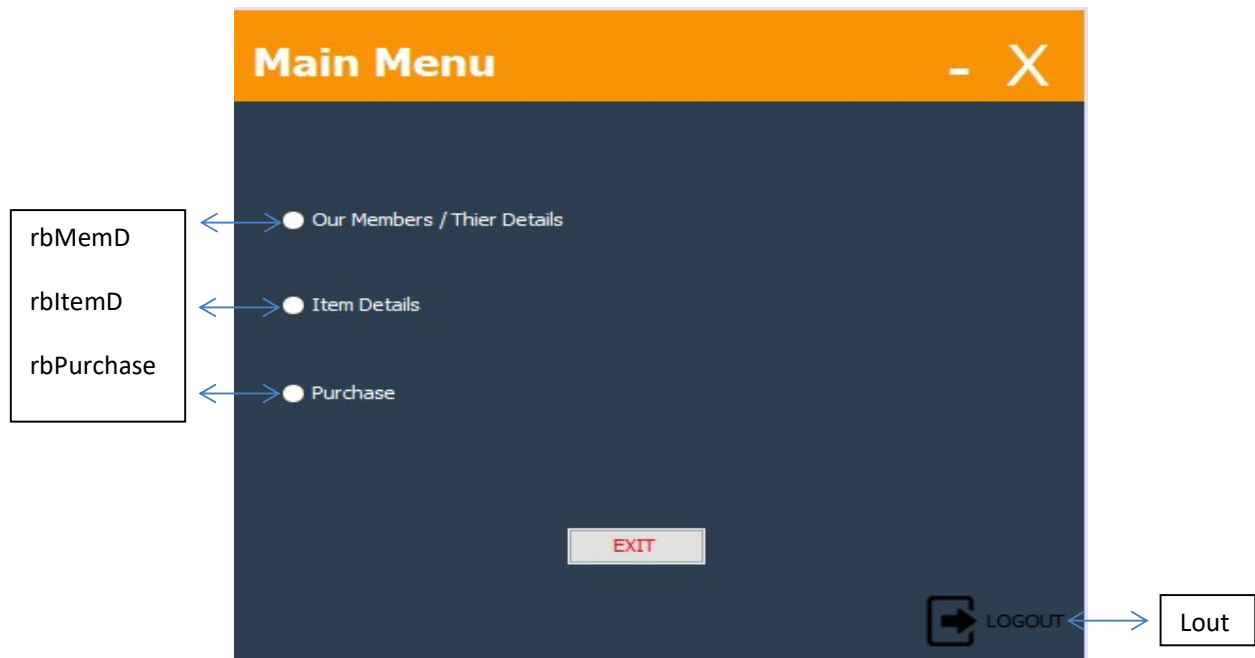

catch(Exception e) {

```

```
JOptionPane.showMessageDialog(this,e.getMessage()); } }
```

1. Coding for Update Member OK Button:

```
private void jButton1ActionPerformed(java.awt.event.ActionEvent evt) {  
  
    String Name=tf1.getText();  
  
    String UID=tf2.getText();  
  
    String Gend=tf3.getText();  
  
    String Phon=tf4.getText();  
  
    try  
    {  
        Class.forName("java.sql.DriverManager");  
        Connection con=(Connection)DriverManager.getConnection  
("jdbc:mysql://localhost:3306/project1","root","tiger");  
        Statement stmt=(Statement)con.createStatement();  
        String query2="update members set userid='"+UID+"', Gender='"+Gend+"',  
PhoneNo='"+Phon+"' where Name='"+Name+"';";  
        stmt.executeUpdate(query2);  
    }  
}
```

```

        JOptionPane.showMessageDialog(this,"Member updated successfully !");
    }
    catch(Exception e)
    {
        JOptionPane.showMessageDialog(this,e.getMessage());
    }
}

```

2. Coding for Clear OK Button:

```

private void jButton2ActionPerformed(java.awt.event.ActionEvent evt) {
    tf1.setText("");
    tf2.setText("");
    tf3.setText("");
    tf4.setText("");
}

```

Delete Member

jFrame: “deletemember_2a_c”

The screenshot shows a Java Swing window titled "Delete Members". The window has a dark blue background and an orange title bar. Inside the window, there is a text field labeled "User ID" in yellow. Below the text field, there are three buttons: "Delete Member", "Clear", and "Back". At the bottom of the window, there is a yellow hint message: "Hint! Provide us your UserID which you want to delete" and a "LOGOUT" button with a right arrow icon.

1. Coding for Delete Member OK Button:

```
private void jButton1ActionPerformed(java.awt.event.ActionEvent evt) {  
    String UID=tf2.getText();  
    try  
    {  
        Class.forName("java.sql.DriverManager");  
        Connection con=(Connection)DriverManager.getConnection  
("jdbc:mysql://localhost:3306/project1","root","tiger");  
        Statement stmt=(Statement)con.createStatement();  
        String query2="delete from members where userid='"+UID+"'";  
        stmt.executeUpdate(query2);  
        JOptionPane.showMessageDialog(this,"Member deleted successfully !");  
    }  
    catch(Exception e)  
    {  
        JOptionPane.showMessageDialog(this,e.getMessage());  
    }  
}
```

2. Coding for Clear OK Button:

```
private void jButton3ActionPerformed(java.awt.event.ActionEvent evt) {  
    membersD_2a ff = new membersD_2a();  
    ff.setVisible(true);  
    this.setVisible(false);  
}
```

    for(int i=0; i<rows; i++)  
        model.removeRow(0);  
}  
}
```

Softwares & Drivers used in this project are:

1. NetBeans IDE (Front-End)
2. JDBC Driver Manager
3. MySQL (Back-End)

Some Common elements:-

1. Minimize:

```
private void lbMinMouseReleased(java.awt.event.MouseEvent evt) {  
    this.setState(proceed_1.ICONIFIED);  
}
```

2. Close Button:

```
private void lbCloseMouseReleased(java.awt.event.MouseEvent evt) {  
    System.exit(0);  
}
```

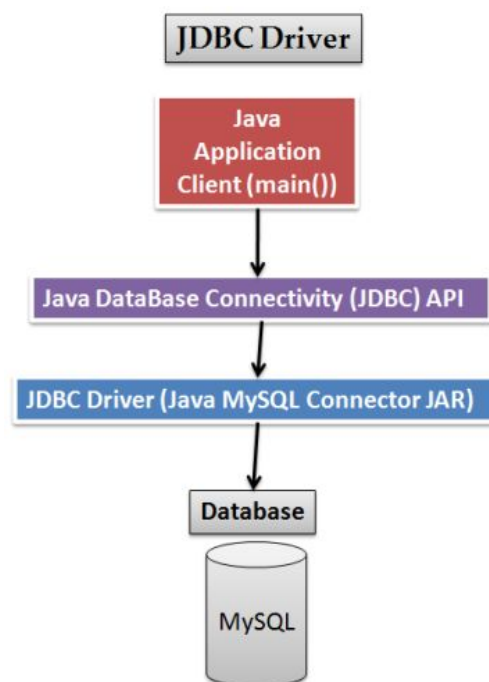

About Data Connectivity:

A link needs to be established between the Front-End and Back-End using JDBC Driver (Java database connectivity) to facilitate communication between the two. A complete application requires combination of three i.e. Front-End, Connection and Back-End.

A jdbc driver manager defines objects which can connect Java application to jdbc driver.

To establish connection between Back-End and Front-End we require 2 components –

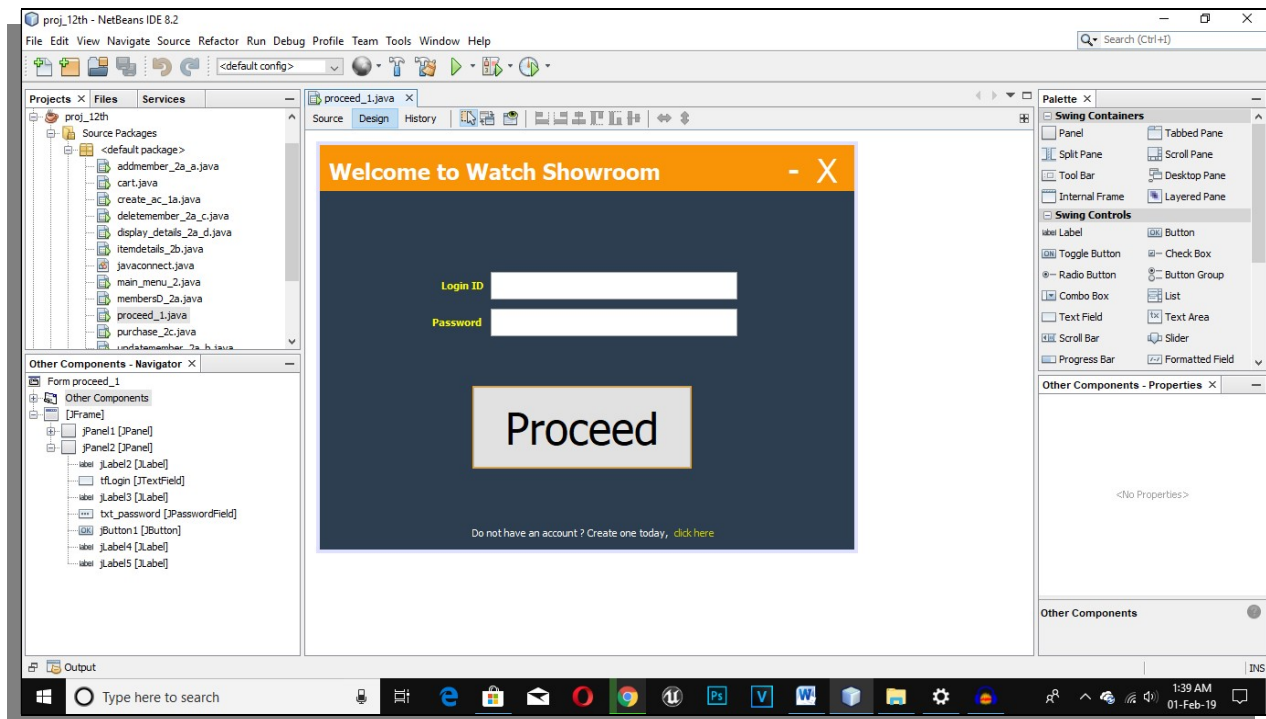

1. JDBC API (Java Database Connectivity Application Programming Interface)
2. JDBC Driver for MySQL

Front-End

It is a GUI that helps users to design forms to accept data and provide instructions for retrieving information from the Back-End.

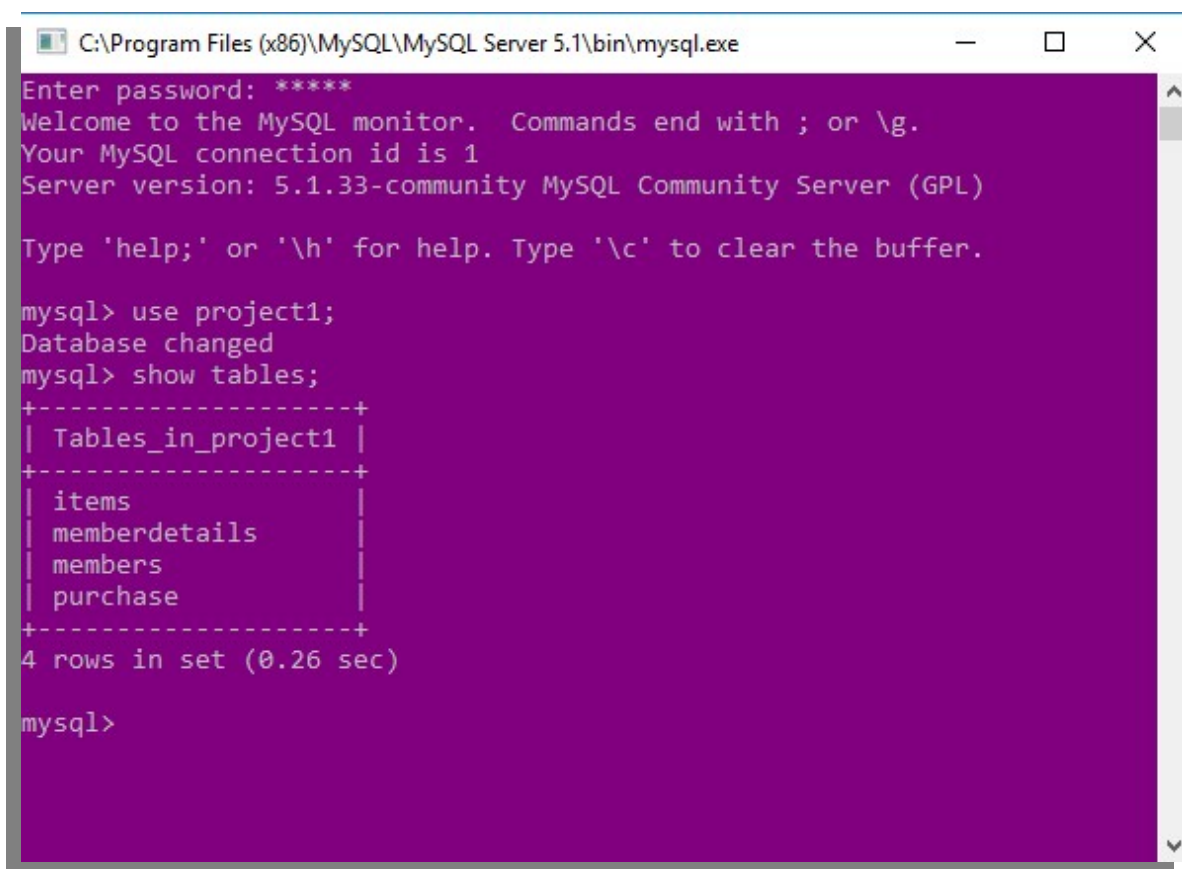

For e.g. NetBeans IDE

Back-End

It is a database which helps in storing data in organized manner for future use and reference.

For e.g. MySQL

```
C:\Program Files (x86)\MySQL\MySQL Server 5.1\bin\mysql.exe
Enter password: *****
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 1
Server version: 5.1.33-community MySQL Community Server (GPL)

Type 'help;' or '\h' for help. Type '\c' to clear the buffer.

mysql> use project1;
Database changed
mysql> show tables;
+-----+
| Tables_in_project1 |
+-----+
| items               |
| memberdetails       |
| members             |
| purchase            |
+-----+
4 rows in set (0.26 sec)

mysql>
```
